LIFE INSURANCE SAMPLING SOP

Version: 1.0
Effective Date: 01/01/2026

1. Purpose

This document is synthetic training material.
It describes a hypothetical sampling workflow.

2. Document Review

The sampler should verify that required customer documents are available and readable.

3. Identity Review

Customer identity information should be checked for consistency across submitted documents.

4. Escalation

Cases with missing or inconsistent information should be referred for human review.

5. Decision Principle

An automated system should not invent facts.
Missing evidence should be treated as unknown.
